MeestB2B_API

Meest B2B Web Service API system integration

Revision: 3.0

Latest changes

3.0

- More countries for shipping (please contact your sales manager)

2.6

- Change in createManifest API method (option for generate dispatch registers for each transport) - additional fields: closeManifest, transportID. System can accept few unclosed manifest with same transportID and the last one with flag closeManifest as true will merge them together and close (Creating Manifest(createManifest)).

2.5.12

- Export data from manifest to XLS document (for FRAKTAL program)

2.5.11

- Fixed XLS generation (column names in return's report)
- Fixed weight calculation when adding package from admin panel
- Minor optimization and changes

2.5.10

- Generate global proform invoice based on dispatch register import numbers

2.5.9

- Handling error messages from the Rosan system in response from the API
