

Get information on a parcel by barcode (findParcelByBarcode)

The method is used for collecting information on a parcel from the Meest Polska system by the parcel's barcode After correctly creating a parcel, it has a set of data of the recipient, collection point, value and items. It also has a link to print customs documents

Method name:

```
public ParcelApiBean findParcelByBarcode(String barcode, String apiKey)
throws
    MeestException;
```

Example of use:

```
<soapenv:Envelope
xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:log="http://logic.meestgroup.com/">
  <soapenv:Header/>
  <soapenv:Body>
    <log:findParcelByBarcode>
      <!--Optional:-->
      <arg0>CVxxxxxxxxxPL</arg0>
      <!--Optional:-->
      <arg1>partnerApiKey</arg1>
    </log:findParcelByBarcode>
  </soapenv:Body>
</soapenv:Envelope>
```

Response:

```
<soap:Envelope xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Body>
    <ns2:findParcelByIdResponse xmlns:ns2="http://logic.meestgroup.com/">
      <return>
        <barCode>CVxxxxxxxxxPL</barCode>
        <deliveryDate>2017-04-18T08:37:45.453+02:00</deliveryDate>
        <deliveryNumber/>
        <idParcel>xxxxxx</idParcel>
        <parcelNumber>CVxxxxxxxxxPL</parcelNumber>
